

1. Protecting the environment is one of our highest priorities and will be a major factor in decision-making at the 118th Airlift Wing. The Wing is dedicated to continued improvement of our processes to prevent and reduce waste generation. The Wing will maintain compliance with Federal, State, and local environmental laws and regulations as well as Executive Orders and U.S. Air Force instructions and guidance.
2. The 118th Airlift Wing mission includes the operation and maintenance of C-130 aircraft with the support of corrosion control, aerospace ground equipment, vehicle maintenance, administrative functions, and facilities maintenance. In all the Wing's activities, we seek to:
 - a. Promote the conservation and sustainable use of natural and manmade materials;
 - b. Minimize environmental pollution and waste generation;
 - c. Build environmental concerns into all policies, programs, and missions;
 - d. Integrate environmental information into all levels of management;
 - e. Achieve continuous improvements in environmental performance over and above regulatory and legislative requirements; and
 - f. Work in partnership with all stakeholders to promote waste reduction.
3. The 118th Airlift Wing has achieved an enviable environmental record within the Air National Guard. Through being good stewards of the environment of middle Tennessee in which we share with then local community, we prove that we are good neighbors and citizens within Nashville and Davidson County. This environmental policy is made available to the public through public notices such as posting on the 118 Airlift Wing public website.
4. Compliance with the Environmental Policy is the responsibility of every member of the 118th Airlift Wing community in accordance with his or her role and responsibilities within the organization.

ELWYN R. HARRIS, JR., COL, TNANG
Wing Commander
